# pg_typical

## Type I/O Routines

*pg_typical provides routines for serializing and parsing many PostgreSQL types. This is primarily of interest to client developers that wish to convert binary PostgreSQL objects off of the wire into Python objects and back.*

## Table of contents

| Version | Download | Documentation | Description |
|---------|----------|---------------|-------------|
| 1.0 | Source.tgz | HTML | Latest Stable |

## 1. Features

- floating point & integer timestamps
- record types
- array types
- geometry types
- network types

## 2. SCM

```
cvs -d :pserver:anonymous:@cvs.pgfoundry.org:/cvsroot/python
co typ
```
